

# PALETTONE

## DISCOVER A NEW WORLD OF COLOUR

Our natural world is alive with wonderfully concealed textures and materials that create beautiful arrangements of shades and colours.

When exploring our surroundings, we can often be absorbed with a focal point or an exceptional view. This can often distract or disguise many of the smaller components that make up what we see. Only when we look closely at these individual elements, is it possible to discover a whole new world of shades and colours.

We have used this philosophy to generate our new Palettone flooring collection.

Featuring a solid colour base with complementary toned highlights in a palette of 50 shades.

We hope this will inspire you to construct a captivating foundation for your next interior design project.
